

HUGGER® INFLATABLE SHELTERS

IS-550 Series

An Effective Weathertight Seal

The IS-550 Series Dock Seal provides an energy tight seal for the climate controlled dock environment. The dock operator inflates the top and side seals once the trailer is secured. The blower runs continuously during loading operations and automatically retracts when completed returning to a stored position away from the trailer. The IS-550 features a rigid head frame, high wear resistant fabric, translucent top cover and header mounted motor and blower.

IS-950 Series

The Ultimate Energy Seal

The IS-950 Series Inflatable Dock Shelter pushes tight against the side and the top of the trailer to keep out inclement weather and reduce energy loss. The shelter inflates once the trailer is secured. The unique retraction system quickly deflates the vinyl bag, and returns to the stored position once loading operations are complete. The IS-950 Series features high wear resistant fabric with double lock stitching, rigid frame with translucent side and top covers and head mounted motor and blower.

BoxCar™ IR-650 Series

Effective Protection for Standard Boxcar Loading/Unloading Operations

The IR 650 Series BoxCar™ Inflatable Shelters improves safety and productivity while reducing energy loss during loading/unloading operations. The shelter is activated once the railcar is positioned creating a weathertight seal. The IR Series is available in custom sizes and projections to suit specific applications. The BoxCar™ Series features high wear resistant fabric, quick retraction system and on/off pilot light. Four sided units with bottom are available including a velcro attached break-away fabric panel.
